Abstract
There are three aspects to strengthen honest governance education to Chinese policemen which include fully utilizing policemen to construct socialist harmonious society, strengthening ideology and politics education to policemen to develop their autonomy, establishing complete the system to punish and prevent corruption in policemen to further construct system.

Key words: Chinese policemen; Honest governance education; Strategy

INTRODUCTION
To educate Chinese policemen in honest governance, one should emphasize both theory and practice and highlight its introductory character. When police organ is constructing honest governance culture, it needs to integrate honest property, cultural taste and police character to build an intensive atmosphere for construction of honest governance. It needs to fully utilize departments of discipline inspection, political work and propaganda to establish a responsibility system of team working, an innovation system of cultural works, an organization system of policemen participating, and an encourage system of processing in construction of honest governance culture, which has positive interaction and mutual promotion with police work and team construction. It needs to have both form and spirit and emphasize penetration ability. It needs to integrate culture of honest governance and construction of carrier. It needs to discover the cultural core and to express function of culture in education, development, and guidance in vivid, lively, novel and unique way. It needs to actively construct fine project of culture of honest governance. It needs to select policemen with talents of writing, editing, acting, and painting to establish warehouse of talents and arrange creative tasks to them. Meanwhile, it needs to widely employ experts to strengthen instruction, to discover, to refine and to create honest governance cultural works from combating corruption and advocating clean governance practice of the police system. It needs to interact with both inside and outside, emphasize pluralism. It needs to infuse culture of honest governance into construction of socialist advanced culture, fully express pluralism and vitality of culture of police honest governance.

1. FULLY UTILIZE POSITIVE FUNCTION OF POLICEMEN IN CONSTRUCTING SOCIALIST HARMONIOUS SOCIETY
Our country is in a new stage of fully constructing well-off society, accelerated promoting socialist modernization. As an important force in securing stability of society, it has to improve abilities of maintaining national security, controlling social security, responding emergency, and serving economic society. It challenges construction of policemen team and demands new and higher requirements on striking crisis, protecting people, and securing society.

1.1 Continuously Insist on Constructing Police Politically and Keep Political Nature
Meng Zhujian, a member of Central Committee of Policy and Law, has emphasized that political construction
should be considered as the first place of police, in addition, it needs to develop and promote spirit for policemen in new period as “loyal, reliable, just, brave, disciplined, and selfless”, to keep policemen team loyal to the Party, the nation, people, and law. Thus policemen should continuously arm them by scientific outlook on development, should further improve overall awareness, political awareness, sense of urgency, sense of people, and sense of law, should enhance their self-motivation and insistence on processing direction, policy and strategy of the Party, should keep pace with Central Committee of the Party on ideology and action, should be a loyal guarantor to the Party and people forever, should establish proletarian idea of “use power for people, take care of people, make benefit for people”, should actually make solid ideological foundation of “establish police for justice and enforce law for people”.

1.2 Improve Comprehensive Ability and Secure Stability of Society
To improve comprehensive ability and secure stability of society are to improve ability of maintaining national security, to improve the ability of handling the situation of public order, to improve ability of serving development of social economy. Thus policemen should insist “stability is everything” basing on reality of police work and fully work on maintenance of social security. However, social environment is not peaceful. It is in a dangerous situation that includes confliction in deconstruction, salary confliction resulted from re-organizing enterprise, and so on. All these are challenging maintenance of social stability. Improper processing on those issues will lead to adverse effects on society. Therefore, policemen need to keep increasing their political sensitivity to fully understand the complexity of struggle under the current situation, difficulty in securing social stability, and importance of firming the Party’s ruling. While leading people to treat national emotions and adjustment on profit relationship in revolution correctly, policemen need to further complete construction of fast reaction system, to improve working ability on emergent event, to actually secure unity and stability.

1.3 Keep Strengthening Regularity of Police Team to Improve Overall Quality of the Team
Nature and task of police work have determined that policemen team has to process united, regular and strict management. Also, in order to adapt to requirements of socialist harmonious society, policemen team needs strengthened construction on regularity and improved regularity level. Thus police departments must follow requests of Ministry of Public Security that to adapt to demands of constructing socialist harmonious society by innovating on administration system, improving quality of people, completing rules and system, being supported by techniques, educating, supervising, and managing police team, and improving regularity level of the team.

2. STRENGTHEN IDEOLOGICAL EDUCATION ON POLICEMEN AND DEVELOPMENT OF SELF-DISCIPLINE
To process ideological education is the base of standardizing behavior. Keep operating ideological education on the team, stabilizing defense on corruption and treason, improving self-discipline, and establishing sense of not disobeying rules are strategies that aiming at foundation of preventing law-breaking.

2.1 To Process Education on Ideal and Faith
Ideal and faith are mental support and behavior guide of one’s life. Ideal and faith are navigation marks in one’s life since once you have noble ideal and correct faith, you won’t lose your standard and direction of your life, which makes lost in lust impossible. Currently, key points of ideal and faith education are focusing on “serve people, be practical, and be honest” and “two of have to” to promote fine traditions of the Party. It needs to guide policemen through education to make them know black from white, to firm their directions, to establish the correct view of world, of life and of value for them, to improve political and ideological personality and moral quality, to make them free from fame and gain, to be a clean officer and an honest person, to work fairly.

2.2 To Process Education on View of Power
To establish correct view of power for policemen is highly related to success or failure of police. View of power actually is the view of attitude, emotion and reorganization to people, is the view of to keep the power for whom, and to use the power for whom. Policemen are representing the country to use power. Only if correct view of power is established, one can express positive effect of power of enforcing law and use it to sever people, benefit people, to interact with people more closely, to win understanding and support from people, to stabilize ruling position of the Party and to secure the nation as a consequence. To establish correct view of power is to build awareness of serving, to study, to improve ideological level and moral accomplishment, to know well in basic principles of dialectical materialism and historical materialism, to treat relationship with people correctly, to be regardless of fame and gain, to establish correct life goal and noble moral sentiment, and to keep inert to fame, gain, power and corruption.

2.3 To Process Education on Warning
Using negative examples to warn people is a specific and shocking measure in education with honest governance. It usually will get good result to process warning education of policemen while teaching them party rules, policy rules and laws. Using important cases around country and cases of policemen violating law and discipline as negative examples, organizing policemen to watch educational films, to participate exhibitions, and to attend
ground discussion to treat process of warning education as a self-checking process of honest and self-discipline and a process of training party spirit for party members and cadres. It needs to provide lots of examples to pursue people, to educate people, to warn policemen, leaders and cadres and let them learn from those examples.

3. TO ESTABLISH COMPLETE PUNISHMENT AND PRECAUTION SYSTEM ON CORRUPTION IN POLICEMEN AND KEEP CONSTRUCTING THE SYSTEM

It needs to avoid violation by standardization in constructing supervisor and restriction systems for all police work and power. Aiming at making policemen not able to violate rules, it needs to build a defense line including both supervisor and precaution. Currently, it needs to focus on key points below:

3.1 To Complete Every System

It needs both ideological education and complete system to strengthen construction of honest governance of policemen. System is a standard for people’s behavior, is an effective form and guarantee for combating corruption for public integrity. Of all ages, any army that has no standard and regularity to a restriction would have no fighting capacity, so does the police team. Thus constructing system is an important guarantee of team construction and strengthened honest party-style construction. When working on it, one needs to complete every rule and system, as well as make every currently available rule effective.

3.2 To Complete System of Power Restriction and Both Inner and Outer Supervisor

Deng Xiaoping once said that “losing or not enough restriction on power will cause corruption”. The reason that our party is continuously combating with corruption however it is growing is, subjectively, that we didn’t complete restriction system for power timely. One current and future important task is to complete and strengthen the power restriction system. It needs to work on the inner and outer supervisor.

3.3 To Construct Leader Team

It is said that “bad leader causes a bad team”. It is proofed that any department with a good leader team and a good representative will have effective honest party-style education. Head leader of the police department needs to be on full leading duty of honest education to his department. In addition, other members of the leader team should be responsible for honest education in their duty fields according to their works. Leaders of the police department need to analyze honest condition of their department according to superiors’ requirements, especially new conditions and problems under the new situation, to study and design honest education work plan and execute it. Leaders need to work on themselves and promote policemen by their honest. Leaders in disciplinary inspection, supervision and inspection departments need to position themselves and take effect on work bravely, and finally become the main force of anti-corruption.

3.4 To Deepen Logistics Revolution

Growing corruption in the police department is related to lack of financial guarantee in the police department. To strengthen honest education of policemen, revolute logistics system is necessary. It is proofed that to use penalty to maintain operation of the police department is not desirable. It will lead to negative results like penalty-replaced law, heavy penalty on minor crime and case for a penalty which leaves the legal system. To strengthen logistics system, the first task is to solve the “royal salary” issue. The second is to separate income and outcome, which refer to separate penalty income and submitting penalty. Every administrative fee and penalty income should be submitted to national timely and fully in order to avoid interception, defalcation and losing public funds which are the source of improper spending. In addition, it can promote financial input on policy works. The third is to strengthen management of output and cut down unnecessary expenses, especially entertainment fees, to utilize fund on critical places and improve efficiency, as well as to stop luxury and waste. The fourth is to treat policemen well and care their personal lives. Leaders at every level of the police department need to do their best to fill proper demands of policemen. It needs to keep policemen’s lives in mind, solve their problems and remove their concerns, which will promote honest construction practically.

CONCLUSION

Honest governance education to Chinese policemen needs to continuously focus on team construction. On one hand, it needs to strengthen education to policemen basing on honest party-style education. On the other hand, it needs to intensify team management, to complete and to innovate management system, making sure that it has new idea for new condition, new solvent to new issue and new breakthrough to hot and difficult problem.
